Guys,

Was up there today. A buddy and I did some fishing. As I can say for the "ditch mill", We watch two trout swiw right over it into the ditch. Not news to me since I see so many trout swim out of the Conococheague right up and over the falls of Falling Springs.

But, I think the rainbows will love the water. We fished the new projects and caught seven rianbows and seen more. So who knows, but I kinda like it.
