Mkern, some people will never see the light... More fish for us. I fish a lot and nymph alot of the time, too, but I don't see how it could be boring. To each his own I guess.

I would also suggest Float Master indicators, or the Fish Pimp (football with rubber tubing insert) style indies. You can also try tying a section of yellow HI-VIZ Stren into your leader and use that as an indie, too. I fished some of the Float Master indies up on the Erie Tribs this past weekend, and was really impressed with them. I just wish I could find more subdued colors.
