I would like to add that there are many more "cheap" indicator options.

The first one I used was I bought a sticky-backed foam sheet from a craft store. I cut 1" x 1/2" strips and cut a notch in the middle of both sides (this makes them easy to remove).

Countless indicators for 50 cents.

Another great cheap indi, is a small balloon. Blow it up streamside, maybe the size of an almond, trim the end, and attach to your leader using a false-knot (one that will disappear once the balloon is gone).

I don't have a link for it, but I'm sure it's on youtube.
