Hey Ginky,
When was the last time you cleaned out your vest. Could just be some old food or waste you put in a bag. I've also had gas i dont remember releasing that gets trapped in the waders and then about knocks me out an hour later. Just kidding. I have smelled the stank on the Conodeguinet in the past during low levels. Haven't been there this summer but I wouldn't be surprised if it is stinkin!
