This puzzles me... I've been around for a while and I've never heard of a 7' 6" F&F in graphite. 7'9", but not 7'6".

The old cane F&F was a 7'6" 5 wgt., but that's a graphite rod in the pictures posted.

When was this rod made and (sincerely bagging your pardon), are you sure it isn't 7'9"?
