OK, thanks for the gracious response.

If I didn't already have 2 of them (one from 77 and the other from 85, I think..) I'd snap it up in a heartbeat.

In a world that has (IMO) gone a bit loony with light lines weights and fast rods, I think the F&F is THE quintessential rod for streams in the 15-30 foot width class, a class that covers the majority of PA's best freestone wild trout streams.

Somebody ough to jump on it, its a bargain and then some..
