I was a good boy last year and ended up with a bunch of the Cabellas stuff, namely the fly tying desk, spool safe, storage cabinet and fly tying station. They all work good together and keep all my stuff out of sight and relatively organized. my Renzetti Traveler vise fits the adapter on the fly tying station perfectly so instead of a simple base I have a wooden drawered box with tool storage on the top and I can keep my magnified lamp attached to the vise. Makes it easier for me and doesn't take up a lot of room. And, with the right choice of Minwax satin poly-stain it matches the rest of the furniture too.
