Come on now, you know damn well that you are not going to use a Crown condom anyways. Midaswell use sheep skin.

FWIW, there is a fly shop online that sells them 4 / \$2. You get 6 Vladi's out of one condom.

Points: Don't tie a bunch and store them as they will rot. Try to remove as much of the lube on them with a towel as possible as they are slippery bastards. You have to find the proper tension on the material to keep it from slipping on the hook. You don't need a bunch of them as their design causes them to bounce on the bottom and not get hung up a lot.
