Well I went down to TCO mainline today to cast the rod. It was like they were waiting for me the rod was all ready strung up with a fly , a deerhair frog with four legs. They only had the smallie rod there which sucked because I wanted to try both rods The smallie rod casted awesome so good that he only put 6 ft on 20 lb line on it and it casted the bug like a rocket with ease and accuracy it turned over the fly with no problem with just one segment of leader . The rod was also light in had and I don't think that I wouldn't have any problems with using it all day casting giant flies . This rod is a bargain for the price all you need is a reel and your in like Flynt . I would recomend this rod to anyone who likes to cast big flies ounce you try this rod I don't think that you will ever go back to the old way of fishing for Bass.. 🏆
