First photo is overview of tying/poker/man cave room.

Second is the tying station I threw together one day. It was actually cleaned up for once, then Jay got drunk and started producing 6" streamers.

Third is a mobile material storage. It is on rubber rollers so I can wheel it into a small closet off the basement entry.

Last is a group of Czech nymphs I tied up the other day just because they have a hilarious name. Well that and I think they are awesome looking. Any one (other than Jay) know the name of this series?

Great setup. I love the mechanics cart setup for the materials.

How often do you find bits of peacock herl wedged between your hole cards?

I'll take a stab..... Gary's Hotspots?
