i seen a topic like this on another website and it got me thinking, what are some of the "off the wall" things i have seen while flyfishing. any of you ever seen anything strange, wierd, creepy or even "X-rated" 😊 while flyfishing in pa.

the one comes to mind was when i was up on fishing creek near lamar, i was up on the upper end near the hatchery. i was standing in the creek fishing the sulphers. i could hear this loud, hard rock music coming from up the road. i could hear the bass clearly. it was getting closer but not at a fast like a car would. then i heard the clunking of horse feet on the hard top. then i saw this amish buggy coming down the road jamming to some hard rock music. i just stood there and watched it gone by. one of the strangest things i had ever seen. i didnt know the amish "pimped out" their buggies like that. talk about strange.

up at penns creek, i get a little creeped out walking back to the truck at night, too many bears and rattlesnakes up there. and i hate going through that tunnel too at night.
