I've seen dead bodies, sex acts, ufo's, and a fawn stuck out in the middle of the delaware river desparately trying to stay above water (bambi made it out alive). I've seen a mouse swim out of boat that was 50+ yards offshore. He made it to shore in partially frozen water without being eaten and was totally exhausted and near death. We warmed him in a glove and about 15 minutes later he was revived and took off into the woods and was then eaten by a hawk (ok, the last part I made up). I saw what I thought may have been a Golden Eagle on the Lehigh River.
