3 years ago during the Little J clean-up day I found:

An adult DVD- Monsters of Rock (cept it wasnt rock but it rhymed with rock)

10 minutes later I found 3 hypodermic needles.

Few minutes later I found a razor sharp arrow.

And (no kidding) a rubber ducky!

Lastly- I was pulling trash off a steep hillside and grabbed a bag and it was deteriorated enough to where the bag broke away and a deer skull and bones and rotting flesh rolled out- agghh! Found two or three more of those bags too- gross!
