I think that based on the advice here I might upgrade the reel. The cabelas reel worked fine and the drag seemed to be ok when I landed a 23" rainbow on it. Believe me that tested it out pretty well. But anyway I might as well upgrade my reel too. So are there any fairly priced reels that anyone might recommend? I don't want to get too pricey for fishing once a week. I am thinking a 4 weight rod instead of a 5 which was a little heavy for most of the trout i've caught so far. Maybe a little bit shorter too would an 8 foot rod be too short for my limited casting ability?
