I like your list. The PH was the fly I took my first trout on so I am partial to it. Scuds and HE's are also some of my most productive now. Woolly Buggers are really popular but I have never had success with them and rarely use them. The Green Weenie was actually a possibility. I love that fly and have had even more success with a Pink Weenie. Used that fly in Mnt Lakes in CO this post fall and it kicked A** on those cutbows.
