Ok...So I decided to go with the 4 weight rod because I really only fish smaller streams. 8'6" seems like the best choice because I could make a decent cast on valley with my old rod which was that long. Also I am buying a different reel because I know that if I get another cabelas reel I will want to upgrade in a month. I checked out the Orvis Battenkill and that was nice so i'll get one of those. Also I read some good reviews about it and the finish is nicer than the cabelas.....which brings me to my next question. Line, I need to buy line because the cabelas combo had line and backing on it and I have to return it with line and backing. I had cabelas prestige plus line before and I don't know if I should buy that again. Would you recommend any lines that aren't too expensive for basic trout fishing? Does cortland line cast well? I have alot of questions. I don't want to make any mistakes.
