Been pouring over the Cabelas and Orvis fly fishing catalogs the past maybe week and tonight kinda picked a few based on some feedback in another thread. I was at Cabelas today and was going to come home with a new rod, but was getting rushed since the snow was on its way. The choices are: St Croix legend ultra 7'6" 4wt, Sage flight 7'6" 4wt, and considering a hydros, not sure if I want to spring that much for a rod right now, tho a helios or hydros would be nice with the free reel deal, I do have a reel all set right now.
