it wasn't designed to be a pellet fly but good shot Jack.LOL

It was tied tapered like a nymph body and it was important to have the correct color/hue or it wasn't very good.

You could go by Art Flicks book

dark gray

light gray

dark brown

light brown

tan.

Ed Koch and Ed Shenk were the big promoters of this tie and I used them out west on ponds and spring creeks where there were NO pellets fed.
