Really don't fish the SWJ that much but seems like it works well on the stocker trout and my intuition tells me to use them after a rain.

Hodge- no offense, but I laugh when you ask questions about Spruce and the J etc.. You know, since you can walk to them and your getting answers from dumb dumbs like me from 3 hours away. Again, no offense to you, just funny to me is all-sure wish I lived there for the fishing.
