I'm glad you brought up the AirFlo Ridgeline FLYBINDER. I think that their concept sounds very logical but have never heard any feedback regarding their product. I have hemmed and hawwed, come close to purchasing their WF4 line but wanted some feedback. It sounds as though you stand behind this product? I'm current using an Orvis Wonderline Gen 3 which is OK, but I'd like to switch to something new. Any thoughts?
