Stopped off at the Little Lehigh to fish the C&R FFO section downstream of Fish Hatchery Road. Fished from 2:30PM-3:45PM hooking only 1 small rainbow on a size 20 black zebra midge with a black bead head. Fishing pressure was heavy, heavier than usual for this popular stretch of water. Water clarity was crystal clear and most fish could be seen throughout this section of creek hugging the bottom. Some smaller fish appeared to be feeding in the current a few inches under the surface of the water. My guess is they were taking midge larvae. I only saw two rises while fishing this stretch of creek.
