Well.....i guess it's time to come out of the closet.....i've been known to fish with worms.....there i said it and it feels GOOOOOOOD. i really don't think anyone on here is that elitist an if they are i feel sorry for them. The VERY BEST way to teach a kid how to handle a fly rod , catch fish and not get bored and spark that interest we ALL talk about is to go out on a trout stream with a can of worms and be prepared to be the baiter (put the worms on for em) and you keep and handle the bait , let them fish. Do that once or twice and then introduce them to doin it themselves and then go to a fly and "see how easy that is?" BINGO you got a fisher for life.
