By the way, found a list of treatment facilities, listed by region. This lists both current and proposed sites.

<http://www.marcellus-shale.us/pdf/PA-Wastewater-Plants.pdf>

Lists the owner, receiving stream, flow, county, GPS coords, municipality, type, status, and facility designation.

Type, I don't really understand. Major types are IW, POTW, direct discharge, CWT. IW = Injection well. Direct discharge is self explanatory. CWT = chemical waste treatment. Anyone know what POTW or OTW stands for?

Status lists the good info. Facility Designation is the easier way to sort it:

MSW = takes Marcellus waste

O&G = takes oil and gas waste other than Marcellus (old shallow wells), but not Marcellus waste.

A P before either means its not operating yet.
