I'll do this one whenever it happens. Gotta fill the box with a variety of buggers. All I've got left at this point in time is olive bugger hackle. Looks like you guys will get the old Jay's favorite bugger. Size 10, black body, black tail, olive hackle. Never really fished a scenario in which it didn't work.

Probably no need (though it is welcomed) to get too very creative. I've never seen two people tie a bugger that looked the same.
