Magazines?

I was just wondering what magazines everyone subscribes to or picks up at the store. I have a short attention span for books and love short articles that magazines offer. I used to love it when I got the Fly Fisherman magazine with my Trout Unlimited membership but now they send the Trout magazine that I think is almost useless. I am going to order Fly Tyer Magazine and I know there are a bunch of others out there. I recently picked up one called Fly Fishing & Tying Journal but it was 99% on western trout fishing. I don't mind a magazine being somewhat on western fly fishing but I want ones that have a good chunk of eastern especially here in the north eastern section of the USA. What are some of your favorite magazines?
