Fishidiot,

They are great!

I believe they are readily catchable on flies as I have caught dozens that way. I use large Puglisi flies in size 2/0 to 4/0 with a tiable wire bite leader and 3-4' level fluoro in 20 to 30lb test on an intermediate line. I use a fast action 9ft 9wt to make pitching the big flies easier. Large arbor reel with a good drag is a must.

The Puglisi flies are large profile, appealing to the muskie, but lightweight, appealing to me!

I have also caught some giant bass with these same tactics.

I don't care if I am using fly gear or spinning/casting tackle these dudes have a bad attitude and are fun to catch!
