Dear gfen,

A couple of years ago on a surf fishing website I visit a guy from Australia posted some videos of a customized ralleye 4WD that he built to tour Africa.

It was based on some commercial truck chassis but basically it was a 30 foot long 4WD Winnebago motorhome that could ford 3 feet of water and drive through powdery sand and waist deep mud. That thing was seriously bad.

That Sugga with the trailer is available for \$65000 CDN if you are interested? Me, I sort of need A/C and cruise control. 😊

Regards,

Tim Murphy 😊
