That Sugga with the trailer is available for \$65000 CDN if you are interested? Me, I sort of need A/C and cruise control. 😊

If it were old exchange rates, I had no babbies and I could somehow convince my wife it was an awesome investment, maybe.

There's a store down here that's got an old MOG in front of it for years, I've never seen it move but I'm going to assume these things were built to last and it would probably start up with a battery and some fresh oil.

I wonder what they'd sell it for. I don't know how fast 100hp in a 5 ton truck can move you, though.

edit: 80HP, with a 43' turning radius. top speed "about 55mph." hah. still want.
