Dale49.....Bob Clouser gave me this formula when i used to live down east. 15" of .017 , 13" of .015 , 11" of .010 , 10" of .009 , 10" of .008 , and 20"-24" of .005 MAXIMA leader material. The rest of these folks think i'm nuts but in the summer when it gets skinny , you can add a strip of 8x and a strip of 10x for a mean brookie leader. Good Luck and HAVE FUN!!!
