Osprey,

Thanks for the formula. I haven't gotten into building my own leaders yet. I'm a pretty decent fly fisherman but a lousy knot tyer, I just don't practice. Used to use a blood knot tool to add tippet to leader and it took forever. I now use a double and triple surgeons knot and it's so much easier.

A question to all who make their own leaders - can you use a surgeon's knot to build a leader as opposed to a blood knot?

Any advise would be appreciated.

Thanks.

Dale
