Actually , Missy , THAT is exactly what an old bird like me wants to hear from young folks , apathy , time(folks have allowed themselves to be in a position that with , kids , job , house/motgage , etc. they just don't have time to be activists) , age , etc. I was a union rep at work , union service is structured much like Public Service , the regulations exist to hold elected officials actions in the spotlight and demand immediate accountability. It's "We The People" who are at fault. We have the right to demand now and then.
