The goal is to remove the dam's, but it is not up to us (LRSA, Delaware Shad Fisherman's Association, or Wildlands) It is up to the owners of the dam's (The City, the Cement Company) to allow us, whatever the study conclude. The cement company is all about the removal, but the EPA did not understand why they wanted to take water out of there quarries until Chris from Wildlands explained it. Easton seems to be on out side, but Allentown is iffy.
