Ok, so all you say is fantastic and I partially agree with a bunch of it. However, we are not just a stocking organization and we do many restoration projects. Hell, look up who basically ran and is still keeping up with the Lausanne mine. I asked you for suggestions on what more we can do, instead you freaked out. You should see all of the applications for grant money we have out to do restoration work and build parks with handicap access. When you are done acting like a #OOPS# bag and would like a project to start to take shape, we would be happy to jump behind it. Thanks
