There will be no stocking of brookies on the Lehigh this year. It will be a 50/50 of Browns and Bows.

Hopefully we will be hearing back soon on the fish ladder on the Po.

Further, I am not the one pushing for exotic species to be introduced into the river. if it would work and it would be safe for the environment in addition to a financial windfall for the local, then I would be for it. All i was saying is that there is talk of this going on through the local organizations.
