Why do people want the Parryville to remain?

No one wants it to remain except a few board members of Palmerton Borough. They have a gravity fed pump house that they sell water from, to Horsehead corporation. Untill Horsehead stops buying water, that dam will remain. Our President has been trying to set up a meeting with the Horsehead owners to reccomend water recycling options, but they do not seem to want to listen.

[Proposed fish ladder and proposal](#)

The picture of the dam is not real good, but picture old wood board running verticle the whole way across. Looks like something from the 1920's, and I do not understand how it is still safe, but it is.
