Yeas I lived in Reading area fro over 20 years...I also remember having snow up to the middle of the screen door several times a winter (thus canceling school, yeah!) But it just seems like between the warm October and the lack of rain until recently, its really been pushed back. At Clarion we used to have the Autumn Leaf Festival the second Saturday in October, now they don't have any color during that time. Yesterday I mowed and raked and I still have A LOT of leaves on the trees. Many of them are still green. I apologize for hijacking this thread but it looks like mid September on the Susky. I guess that translates into more fish though so that's good.
