And some really big nymphs, like size 6 and 8. Oh, with rubber legs.

At one of the jams the rain made Penn's almost unfishable. Some here will remember sitting around John's camper listening to Jonas talk about how to fish Penn's in such conditions. His suggestion was to go deep, go big and go with lots of movement. The only fish I caught on Penn's that weekend was on a size 8 stonefly nymph with rubber legs.
