with wooly buggers theres no wrong way you just have to expirement with what works for you i personally drift them and swing them letting them hang in the current on seems for a sec ill give it a few strips and jerks on the way in but most of them take it on the swing or drif t but as for other streamers i stip them at varying speeds mainly start with an up and across and strip it back in seems to work with a few twitches too  
\*disclaimer\* i am not the most effective streamer fishernan nor fly fisherman for that matter \*\* you just gotta play with it to find what you like
