And for whoever said tippet rings were crazy expensive, would these work? Have to check size, I suppose, they may be too big. The diameter listed is the gauge of the wire, not the diameter of the ring.

I did, realize my sense of cheap is different than most. The pack I bought was \$8 for 20, though, and that's alot of cash for a little metal ring.

Hold on, let me get you a picture of one, I think there's one in the car....
