No knot fas-snap. That is the name of the little u shaped snaps. I actually bought some many moons ago at Dave's in Doylestown. They are still in my vest, but I don't remember the last time I used them. They work as far as I remember, but I feel dirty inside when I use them.

Who makes the no knot fast snaps. I was thinking the ones I had were from Eagle Claw. Mustad isn't the only one.

Maybe I'll find them some day or maybe they were in the vest I threw away with my micrometer.
