\$400 pair of Simms G3 leaked within a few trips. They are pretty annoying. I bought Simms boots at the same time and they failed within a month. I emailed Simms and asked what I needed to do and they said their boots are not made in US and they don't know how to fix them. Told me to take the to a cobbler. Jesus. Screw Simms.

Redsun has G3's sent them back and Simms lost them, found them, lost them took 6-8 weeks to get them back. Repair seems to have worked.
