Wow, less than a month. Time flies! Lookin forward to it.

Yup, sulphurs and march browns. Need nymphs (PT), emergers, duns, and spinners. Also, BIG pheasant tails to represent green drake nymphs, which likely won't be hatching yet but will be active underwater.

And, of course, as is jam tradition, it's going to rain. A lot. In that case, streamers are always good. A black bugger or sculpin is worthwhile to have along.
