I would agree with fishidiot about myflies.com. They have american tyers that tie all their own flies. If you buy "cheap" \$.99 flies then you get what you pay for. Junk steel and rotted thread with minimal thread wraps and no head cement. Buying american made flies is always better. Would you rather lose a fish to a broken hook or have the fly fall apart after a few fish. Paying a few dollars more could save your day. Thats my opinion.
