Sure it won't hurt cause the one near galeton is already drawing the stream down..plus they have 6 wells near me to draw water from once they get the permits at 4 mil. gallon a day per well. Luckily we have the fish culture station there and they are fighting it too. Its a federal one. then one on crooked creek and 2 more in the area there, should I keep going on how many wells and pumping stations all drawing between 4 to 6 mil./gallon/day and they are too.
