Well I decided to head over to a place called Geneva Swamp today in search of my first bowfin. Well I did end up catching around 5 of them baitfishing but also tried fly fishing and didn't even get a bite. I was fishing streamers. Most of the fish I caught were right on the bottom so I probably wasn't getting deep enough fly fishin. But on a happier note we did get into a ton of crappies on the fly, for a while it was a fish on every other cast 🏆

Any tips on the bowfin?

Here's a pic of one of the fish.
