Is it called something totally different where you are, or are you just making fun of the "r" at the end? I've said tape measurer before, I'll admit it. But I consider "tape measure", without the final r, to be the proper name for the thing. If that's still a yinzerism, well, then I am guilty. I have hung onto a few yinzerisms despite being removed from yinzerburgh (and thats with an h for sure) for close to 10 years.
