Anyone have one lying around they're willing to part with. I'm not picky. I have the original vise I started tying on that I got in my beginners kit a couple of years ago.

I'm over it. Can't tying tiny flies, it's not rotary, I'm just fed up with it. Does anyone have anything they'd like to get rid of? I want to save up for a Law or JVise, but need something in between.
