It was a bit before my time but didnt this state learn any kind of a leason when they realized what the cole mining was doing to the streams?? Now that some of those streams are just about back to being in good shape they start the polution thing all over again! To think that the PF&G commission has given permission for drilling in order to make a little more money is very discouraging! I would love to see more windmills on the mountain tops here in Pa. They actually look pretty cool over there in Centralia. How about some solar fields too??
