Speaking of pipelines - google [Tennessee Gas Pipeline 300](#).

Just this past week I crossed this expansion just north of Waymart where I was blown away by the size and scope of this project. Also saw an excavator sitting in what looked like a wetland.

Then while in the western part of the state I also noticed a compressor station being built Franklin. Must have been 80 pickup trucks working at this site. Fortunately the line is following an existing easement. Regardless the project is massive!!

Pipeline upgrades have already started.
