thanks for all the help!!!

tying the bodies is the easy part, i use the needle technique, and tie 2 pieces o moose body hair for a tail, then the deer hair i stack tips down, tie the tips in so they are the end of the body, as the hair flairs, i clean out the hair that isn't secured, i think it gives it a very slight taper that way. spiral wrap down, spiral wrap up, whip finish and pull off the needle. you can trim the der hair tips if you like.
